SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

To supplement the Information Disclosure Statement of November 3, 2004, Applicant notes that SU 887630 relates to a furnace resistance heater for growing crystals, comprising two coaxially positioned cylindrical heating elements made of graphite and provided with current carrying rings at one end thereof and electrically coupled at the other end, wherein the heating elements are, with the aim of extending the service life of the heater, made of graphite powder filling the space between three coaxial tubes made of a dielectric material and electrically connected by a layer of powder supporting a graphite ring, and wherein the current carrying rings are placed in the gaps between the tubes. As indicated, no full translation of SU 887630 is available to Applicant at this time.

Consideration of the references is requested.

Respectfully submitted  
for Applicant,

By: \_\_\_\_\_
